THE CAMERON POLICY

We believe that the best interests of the building material dealer are our own best interests. Because of this belief, we are now, as we have been for years, supporting in every way possible the profitable distribution of building materials through the retail dealer. We sell through the retailer exclusively because we believe that through his store, building materials can more economically and satisfactorily reach the man we all depend upon—the customer.

TERMS OF SALE

LESS THAN CARLOAD SALES: Invoices are due net thirty (30) days after first of month following date of shipment, or 2% cash discount on the net amount of the invoice after deducting actual freight, (whenever any freight is allowable), if settlement is made not later than the tenth (10) of month following date of shipment.

CARLOAD SALE Invoices are due net sixty (60) days from date of invoice, or 2% discount for cash on net amount of the invoice, after deducting actual freight (whenever any freight is allowable), if settlement is made within ten days after arrival.
On all types of sales interest at the rate of 7% per annum will be charged on all past due invoices, however until accumulated interest totals 50c it will not be considered.

CRATING OR PACKING CHARGE

DOORS: No crating or packing charge on panel, glass or garage doors.

SCREENS: No crating or packing charge on window or door screens.

SASH: No crating or packing charge on full bundle lots of sash of the same size and thickness. Full bundles of sash are described as follows:

8	1⅛" Pln. Rl. Wds.	12	Sgl. Sash or Trans. 1⅛".
6	1⅛" Ck. Rl. Wds.	16	Sgl. Sash 1⅛".
4	Cottage Wds.	5	Hot Bed Sash 1⅛".
5	Pr. Blinds.	4	Hot Bed Sash 1¼".

No crating charges on windows or sash of same width in full bundle quantities. (Example: 4 windows 24 x 28, 1⅛" two light check and two windows 24 x 16, 1⅛" two light check; no bundling charge.)

For less than full bundles of sash the following bundling or packing charge to apply:

Glazed Sash, up to 60 United Inches, Glass Measurement	.25
Glazed Sash, over 60 and up to 100 United Inches	.50
Glazed Sash, over 100 United Inches	1.00
Open Sash, per bundle	.25
Blinds, per bundle	.25

OTHER CRATING OR PACKING CHARGES

COLUMNS: Stave or Square Panel, per Crate	.50
STAIR NEWELS: All Stairwork and Newels, per Crate	.35
FIBRE WALL BOARD: When ordered in less than full bundles and carrier requires bundling, per bundle	1.00

RETURNED GOODS

Do not return any goods without first writing us. If our error, we will arrange immediate disposition. If your error, we are glad to assist you if goods are carried by us in stock, but a service charge of 10% shall be made on all goods so returned. We do not carry in stock all of the window sizes shown and will accept for return only the items we carry in stock.

FREIGHT ALLOWANCE

Where we quote delivered prices, we will allow, upon receipt of freight bill, the Common Carrier rate per 100 pounds (Example: Rate 25c per cwt.; minimum charge 40c we allow 25c) however, no freight allowance on orders of less than 100 pounds.

"Delivery of goods to the buyer, or his agent, at the loading place of the seller shall consummate delivery". Credit for delivery charges shall be allowed only upon receipt of expense bill from a Common Carrier. (Freight allowance cannot be made on contract carriers freight bill unless the contract carriers permit is with the sash and door jobber.)

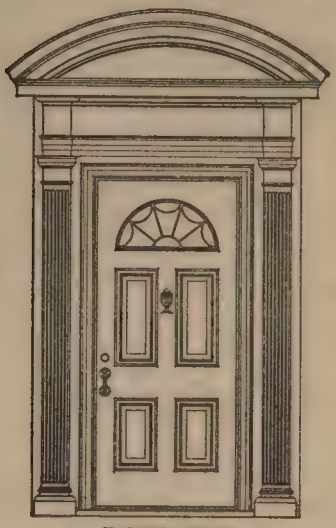
SENIOR SERIES
IDEAL COLONIAL ENTRANCES

Overall Size: 5'-6" x 10'-7¼".

For Prices and other designs for The Medford Colonial Entrance see next page

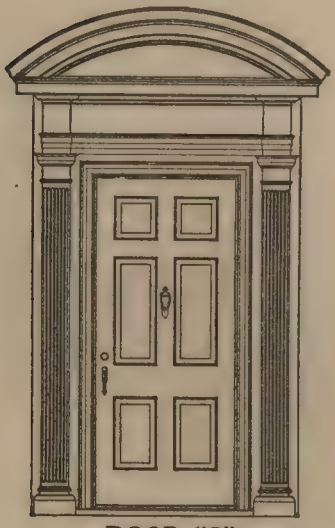
The MEDFORD SENIOR

The above entrance is named "The MEDFORD" because architectural research shows that the graceful segment curve forming the cap piece of the entrance originated at Medford, Massachusetts. Architecturally it is considered original early colonial and has been subject to many adaptations. Shown in the big drawing above is IDEAL Colonial Door "A."

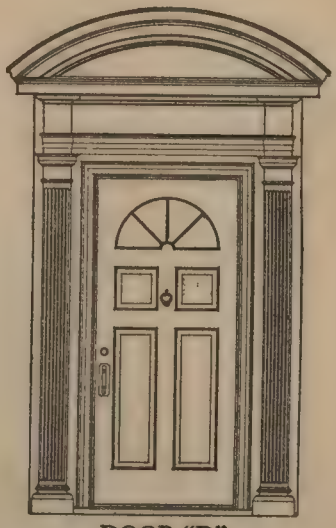


DOOR "B"

The MEDFORD SENIOR Colonial Entrance Shown with Other Attractive Designs of Ideal Colonial Doors



DOOR "C"



DOOR "D"

SENIOR SERIES
THE MEDFORD COLONIAL ENTRANCE
Fluted Pilasters

Includes Entrance, W.P.P. Door Frame with Oak Sill. For Frame Wall Construction. Price DOES NOT INCLUDE DOOR. For price of door see page 11.

3-0x7-0 or Smaller Door Size	41.50
For Brick Veneer or Stucco Wall, Add	1.75

Order door separately.

Above Delivered Via Our Truck

SENIOR SERIES
IDEAL COLONIAL ENTRANCES

For Prices and other designs for The Stockbridge Colonial Entrance see next page

Overall Size: 5'-6" x 10'-9".

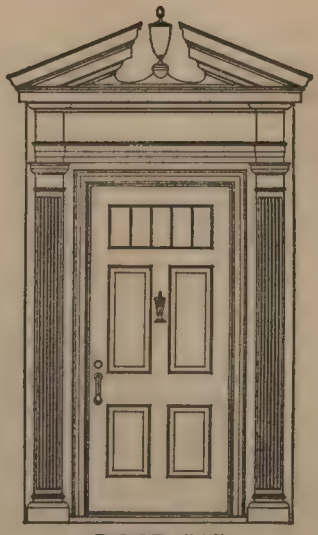
The STOCKBRIDGE SENIOR

The above entrance is named "The STOCKBRIDGE" because insofar as we are able to ascertain the beautiful open pediment effect at the top originated at Stockbridge, Massachusetts. This is perhaps the most copied of Colonial design elements and it is widely used in furniture of that period as well. Shown in the big drawing above is IDEAL Colonial Door "B."

DOOR "D"

The STOCKBRIDGE SENIOR Colonial Entrance Shown with Other Attractive Designs of Ideal Colonial Doors

DOOR "C"



DOOR "A"

SENIOR SERIES
THE STOCKBRIDGE COLONIAL ENTRANCE

Fluted Pilasters

Includes Entrance, W.P.P. Door Frame with Oak Sill. For Frame Wall Construction. Price DOES NOT INCLUDE DOOR. For price of door see page 11.

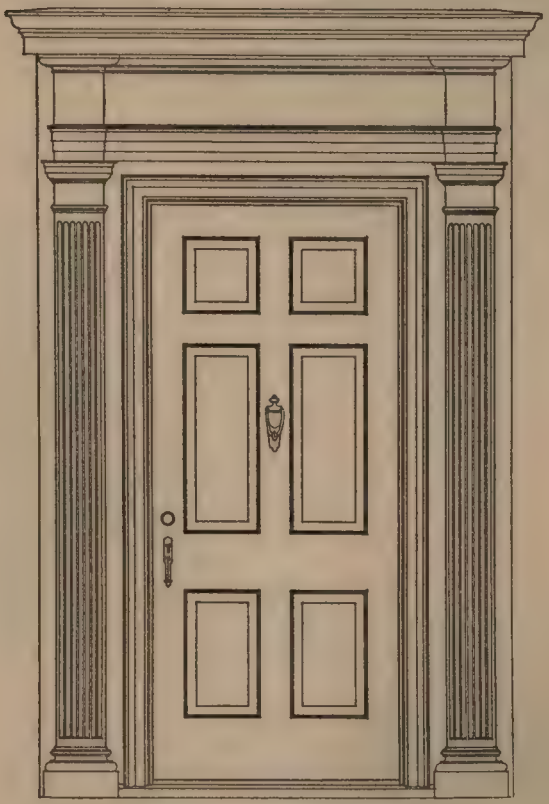
SENIOR SERIES
IDEAL COLONIAL ENTRANCES

For Prices and other designs for The Andover Colonial Entrance see next page



Overall Size: 5'-6" x 9'-4½".

The ANDOVER SENIOR

The above entrance is named "The ANDOVER" because the severe, Puritanical lines of the cap piece seem to have had their architectural origin in Andover, Massachusetts. This entrance is admirably adapted to the use of overhanging roof treatment and tastefully designed trellises may be added at the sides. Shown in the big drawing above is IDEAL Colonial Door "C."

Order door separately.

Above Delivered Via Our Truck

SENIOR SERIES
IDEAL COLONIAL ENTRANCES

For Prices and other designs for The Woodbury Colonial Entrance see next page

Overall Size: 5'-6" x 10'-7¼".

The WOODBURY SENIOR

The above entrance is named "The WOODBURY" because it was at Woodbury, Massachusetts, that the obtuse angled gable forming the cap piece seems to have originated. This design is true Colonial and bespeaks the hardy, substantial characteristics of our forefathers who originated this virile architecture. Shown in the big drawing above is IDEAL Colonial Door "D."

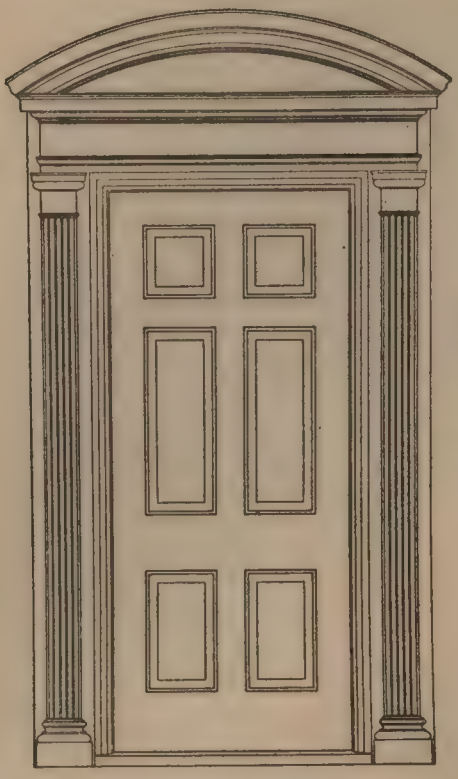
JUNIOR SERIES
IDEAL COLONIAL ENTRANCES



PRICE DOES NOT INCLUDE DOOR

Overall Size: 5'-0" wide, 9'-6" high.

The MEDFORD JUNIOR

This Colonial entrance is architecturally correct but somewhat modified in size to meet popular demand in the small house field.

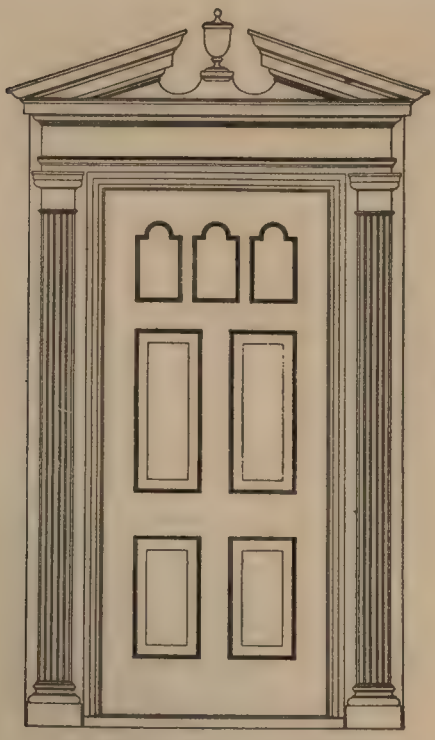
Includes Entrance, W.P.P. Door Frame with Oak Sill. For Frame Wall Construction. Price DOES NOT INCLUDE DOOR. For price of door see page 11.

3-0x7-0 or Smaller Door Size	29.35
For Brick Veneer or Stucco Wall, Add	1.75

Order Door Separately.

ABOVE DELIVERED VIA OUR TRUCK

JUNIOR SERIES
IDEAL COLONIAL ENTRANCES



PRICE DOES NOT INCLUDE DOOR

Overall Size: 5'-0" wide, 9'-7½" high.

The STOCKBRIDGE JUNIOR

The secret of colonial charm is its simplicity. The entrance alone is often the only part ornamented. This entrance will add beauty often sacrificed in the small home because of price.

Includes Entrance, W.P.P. Door Frame with Oak Sill. For Frame Wall Construction. Price DOES NOT INCLUDE DOOR. For price of door see page 11.

3-0x7-0 or Smaller Door Size	25.00
For Brick Veneer or Stucco Wall, Add	1.75

Order Door Separately.

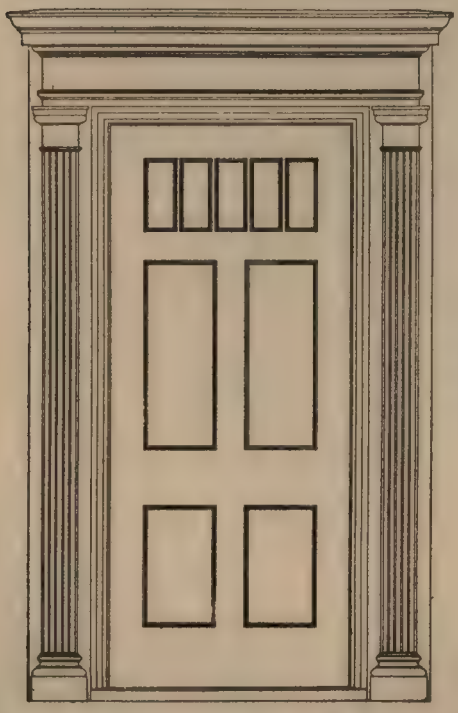
JUNIOR SERIES
IDEAL COLONIAL ENTRANCES



PRICE DOES NOT INCLUDE DOOR

Overall Size: 5'-0" wide, 8'-8" high.

The ANDOVER JUNIOR

In the Andover Junior entrance as in other designs construction has been standardized to effect substantial reduction in price without sacrifice of design or quality. This entrance suitable for cottages, bungalows or other modern types of dwellings.

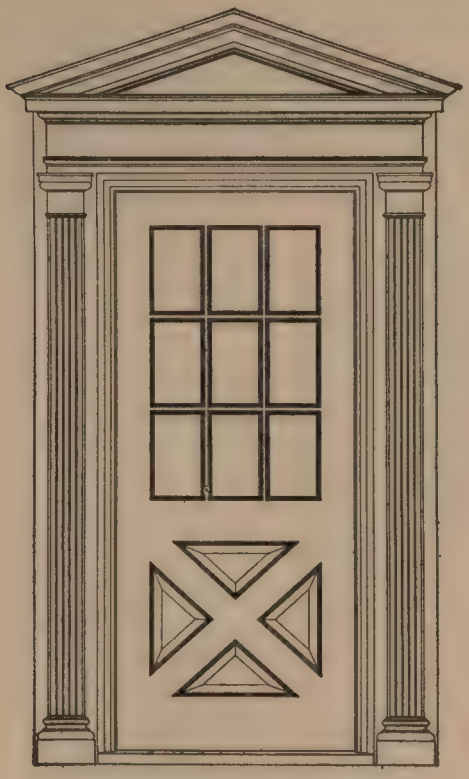
Includes Entrance, W.P.P. Door Frame with Oak Sill. For Frame Wall Construction. Price DOES NOT INCLUDE DOOR. For price of door see page 11.

3-0x7-0 or Smaller Door Size	16.75
For Brick Veneer or Stucco Wall, Add	1.75

Order Door Separately.

ABOVE DELIVERED VIA OUR TRUCK

JUNIOR SERIES
IDEAL COLONIAL ENTRANCES



PRICE DOES NOT INCLUDE DOOR

Overall Size: 5'-0" wide, 9'-6½" high.

The WOODBURY JUNIOR

The Woodbury Junior colonial entrance bespeaks the substantial characteristics of true colonial design. The above is architecturally the same as used by early Americans and adapted to today's colonial influence and at a price to enable its use on moderate priced homes.

Includes Entrance, W.P.P. Door Frame with Oak Sill. For Frame Wall Construction. Price DOES NOT INCLUDE DOOR. For price of door see page 11.

3-0x7-0 or Smaller Door Size	23.75
For Brick Veneer or Stucco Wall, Add	1.75

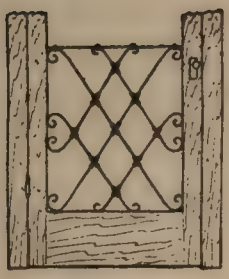
SCREEN DOOR GRILLES

Delivered Via Our Truck—2nd Class



Hutchinson BR1

HUTCHINSON SCREEN DOOR GRILLES

Made of ⅛"x½" Iron—Black Finish

At the left edge of this page the four Hutchinson Screen Door Grilles are pictured. These are practical as well as ornamental grilles. They give rigidity to screen doors, prevent sagging, protect the wire, and enhance appearance. They are adjustable to the more popular sizes of 1 panel screen doors. May also be used as window guards.

UNIQUE SASH BALANCE

A True Counterbalance—NOT a Friction Device

Patented in United States and Foreign Countries

In operation, power is continuously transferred from sash to balance and from balance to sash.

The UNIQUE BALANCE is simplicity itself, there being but one moving part. The balance is constructed of the very best materials. It will last the life of the building.

TYPE "D" BALANCE is a complete unit, consisting of a flexible tube of high-grade oil-tempered wire . . . having a hanger at top and a slotted fitting at bottom, through which slides a spiral rod. At lower end of spiral is a sash holder. Installation is extremely simple. Hanger at top is fastened to jamb at head of frame. Sash holder at bottom of spiral rod is turned three to six turns (depending on weight of sash) and then screwed to lower rail of sash. Turning bottom sash holder creates lifting power in the flexible tube . . . . and this lifting power is equalized by the spiral rod—resulting in a perfectly-balanced sash at every point.

TYPE "D" BALANCE is recommended for use in a window weighing up to 40 lbs. and up to 32″ glass height.

Price Per Set for Double Hung Window to and including 30″ 1.43
Price Per Set for Double Hung Window for 31″ or 32″ Glass Height 1.54

TYPE "C" BALANCE is recommended for use in windows from 32″ to 40″ glass height.

Price Per Set for Double Hung Window up to 30″ Glass Height 1.95
30″ to 40″ Inclusive Glass Height, add for each 4″ or fraction thereof ..... .11

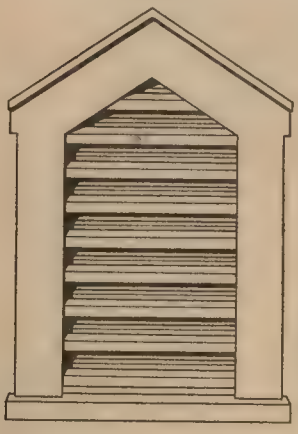
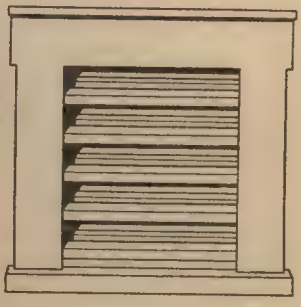
NOTE: When ordering—be sure to state whether for frame wall, brick veneer or stucco construction. The jamb width is not essential. Give roof pitch when ordering peak head type louvres.



Ideal Square-Head Ventilating Louvre



Ideal Peak-Head Ventilating Louvre furnished to conform to pitch of roof. Give Roof Pitch.

BEAUTY—UTILITY—ADAPTABILITY

Three simple words—but they mean much to the home builder—the contractor—the dealer.

Several of the many combinations possible with IDEAL DOUBLE TREATED LOUVRES are shown above.

Twin, triple and other multiple louvres may be assembled from varying sizes of the four basic styles . . . except the circle . . . to suit any architectural treatment. Rough opening size for multiple louvres is governed by sizes of units assembled together with width of mull casing used between units.

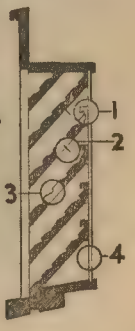
4 POINTS OF SUPERIORITY OVER THE USUAL TYPE OF LOUVRE

Don't overlook these 4 points of Superiority —they are important.

1-2-3. The first three points cover features designed to break the force of the hardest rain.

4. Screened back, as protection against birds, bats, bugs, rats, flies, etc.

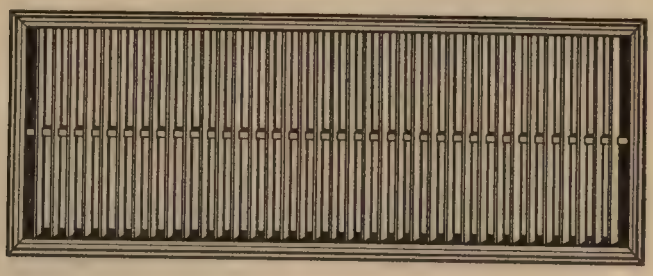
1. Drip Moulding.
2. Metal Baffle Strip.
3. Drain Channel and Splash Breaker.
4. Screened Back.



IDEAL ATTIC FAN CEILING GRILLES

Knocked Down and Carton Packed
Delivered Via Our Truck—3rd Class

Size Number	To Fit Maximum Opening	Dealer Price	Consumer Price
38	3′ x 8′	3.60	4.80
48	4′ x 8′	4.80	6.40



The "IDEAL ATTIC FAN CEILING GRILLE" is precision manufactured of selected Western Ponderosa Pine to meet the increasing demand for an attractive and efficient ceiling grille to be used in connection with attic fans.

The specifications for these grilles were worked out in collaboration with engineers of a large attic fan manufacturer to meet the necessary requirements.

These grilles are furnished knocked down and carton packed. All parts are completely machined and ready for assembly.

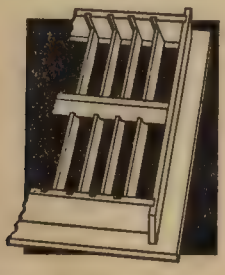
The largest size listed above is the maximum size which can be had in stock grille but either size may easily be reduced on the job to fit a smaller opening.

The slats are set at an angle and should lean toward the fan when installed.

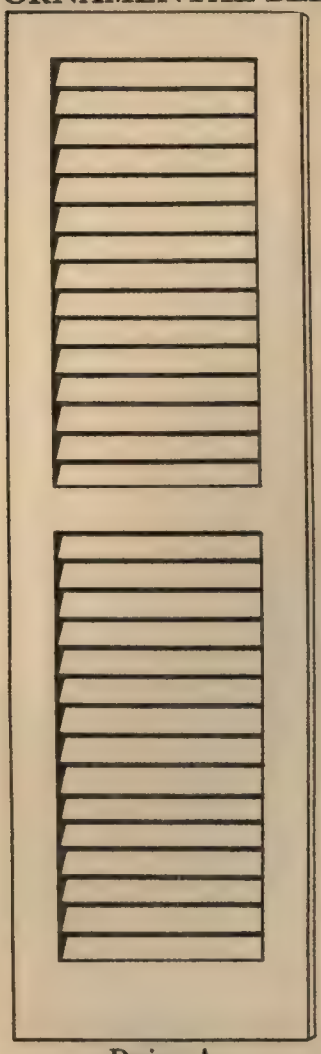
Necessary pieces of IDEAL TYPE "D" W.P.P. TRIM for under side of grille are included in each package.

Instruction sheet for assembling included in each carton.

These grilles are so designed and constructed that they furnish not over 20% resistance and allow not under 80% clear air flow.



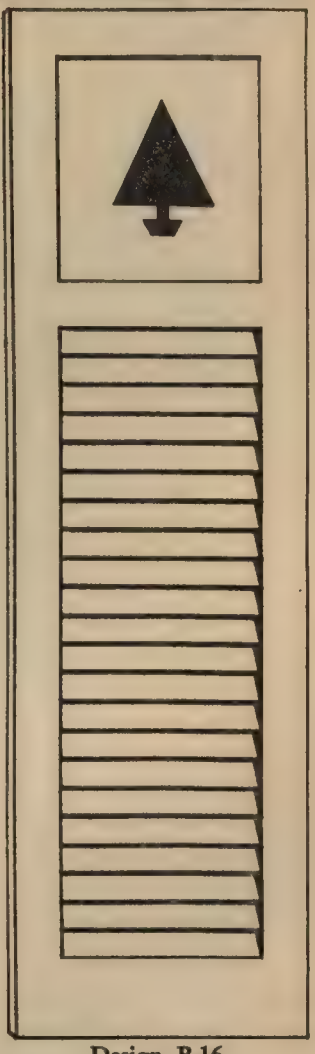
ORNAMENTAL BLINDS WITH STATIONARY SLATS



Design A

"DOUBLE TREATED"

Made in 1⅛ In. Thickness Only



Design B-16

12 stock sizes in each design. The blind shown at the right may be had with any of the sixteen panel designs shown on this page, at no additional cost.

In ordering please specify whether design "A" or "B" is wanted. If design "B" is wanted use design panel number in combination with letter B, such as B-2, B-10, or B-15.

These blinds are not rabbeted.

ORNAMENTAL BLINDS WITH STATIONARY SLATS

Not Rabbeted

DOUBLE TREATED

Delivered—3rd Class

DESIGN "A" OR "B"

Size	Price Per Pair	Size	Price Per Pair
1-3x3- 3x1⅛	3.60	1-6x3- 3x1⅛	3.70

1-4½	14 x 16	8 Lt.
1-3¾	9 x 16	12 Lt.

IDEAL BLIND SIZE

1'-6" x 3'-3". Recommended for following window sizes:

1-5	30 x 16	2 Lt.
1-6	32 x 16	2 Lt.
1-5¼	10 x 8	12 Lt.

IDEAL BLIND SIZE

1'-6" x 4'-7". Recommended for following window sizes:

Half window Opening Width	Dimension of Glass	No. of Lights
1-5	30 x 24	2 Lt.
1-6	32 x 24	2 Lt.
1-7	34 x 24	2 Lt.
1-5½	16 x 24	4 Lt.
1-5½	16 x 12	8 Lt.
1-5¼	10 x 12	12 Lt.

IDEAL BLIND SIZE

1'-6"x4'-11". Recommended for following window sizes:

1-5	30 x 26	2 Lt.
1-6	32 x 26	2 Lt.
1-7	34 x 26	2 Lt.
1-5½	16 x 26	4 Lt.
1-3¾	9 x 13	12 Lt.

IDEAL BLIND SIZE

1'-6" x 5'-3". Recommended for following window sizes:

1-5	30 x 28	2 Lt.
1-6	32 x 28	2 Lt.
1-7	34 x 28	2 Lt.
1-6½	16 x 28	4 Lt.
1-6½	16 x 14	8 Lt.
1-5¼	10 x 14	12 Lt.

IDEAL BLIND SIZE

1'-6" x 5'-7". Recommended for following window sizes:

1-5	30 x 30	2 Lt.
1-6	32 x 30	2 Lt.
1-7	34 x 30	2 Lt.
1-6½	16 x 30	4 Lt.

IDEAL BLIND SIZE

1'-6"x5'-11". Recommended for following window sizes:

1-5	30 x 32	2 Lt.
1-6	32 x 32	2 Lt.
1-7	34 x 32	2 Lt.
1-8	36 x 32	2 Lt.
1-5½	15 x 32	4 Lt.
1-5¼	10 x 16	12 Lt.
1-8¼	12 x 16	12 Lt.

It is not necessary to have blinds conform to wide window sizes. Select the height necessary and a narrow blind in most cases will give the desired decorative effect.

Double Preservative Treated by IDEAL Method N. D. M. A. Stamp of Approval

The IDEAL Fabricated Casement Window Unit includes frame, casement window, and window screen . . . with weatherstripping and hardware applied. The Unit or arrangement of Units (with or without transom) comes to the job completely fabricated—ready to go into the wall.

All wood materials are of selected Western Ponderosa Pine and are preservative treated with IDEAL "Double Treat" (both a toxic treat and water repellant) and stamped with N. D. M. A. Stamp of Approval. Less paint primer is required with this treat.

All sash are glazed with S. S. B. glass—bedded, thereby eliminating air, dust or water leakage between glass and wood. Window screen is wired with 16 mesh galvanized wire screen cloth, flush moulded. 16 mesh bronze wire is available at a small extra charge as shown on price page. Small metal reinforcement bar is in line with wood bar of casement window so as not to impair vision. Screen is held in place by screen lift and lock especially designed for and used exclusively on IDEAL Fabricated Casement Window Units. This is the only piece of hardware required to remove, secure and lock window screen in place.

At left is illustrated an IDEAL Fabricated Casement Window Unit . . . showing exterior and interior appearance, and various component parts. Cut away drawings at right show features of construction. Description of same listed below:

1. The drip cap is rabbeted to make a weather-proof joint with head casing.

2. Groove in drip cap prevents water from entering head casing joint.

3. A wedge-shaped groove in casing receives wedge-shaped tongue on jamb.

4. Top rail, showing contact with weatherstrip. There is no inward bevel on this rail, thus making a water-tight closure. However, bottom rail and stiles do have bevel to shed water and to give proper clearance in relation to the extension hinge.

5. Expansion weatherstrip. Note non-friction method of installation providing tighter seal the harder the wind blows.

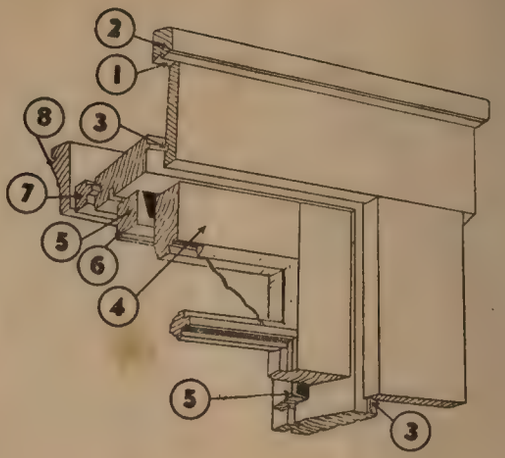
6. Combination stop and weatherstrip holder which also acts as stop for interior casement window screen. Note tongue into jamb groove.

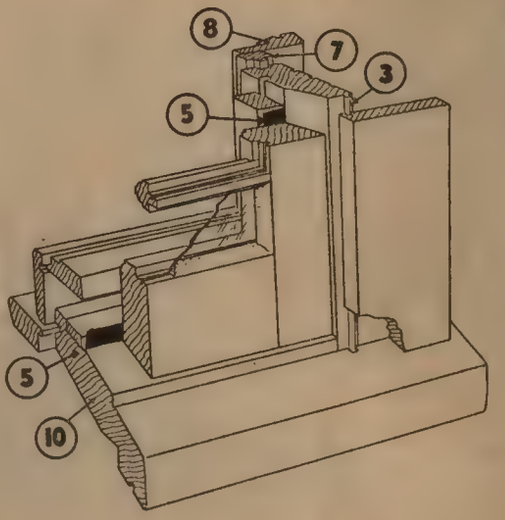
7. Extension jamb permitting alteration to take care of various wall jamb widths. Note tongue fitting into groove at edge of jamb.

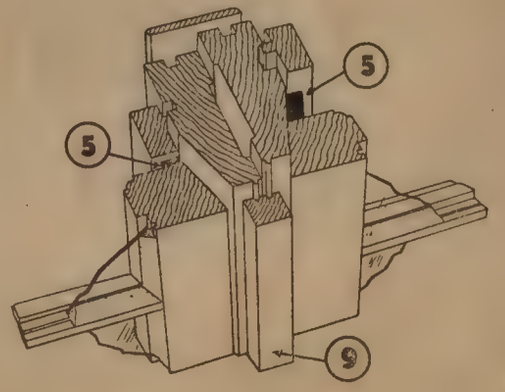
8. Stylish narrow trim, harmonizing with narrow mullion lines may be used . . . a feature dictated by popular demand. We call particular attention to the profile of this trim which permits the applying of the curtain and drapery brackets on FLAT SURFACES . . . an important feature often overlooked. Trim not included in unit prices as other types of trim can be used. Trim is extra—see price sheet.

9. Section through the mullion, showing the narrow tongue and grooved mullion casing. Also note other advantageous features heretofore described.

10. Casement window sill made of two-inch stock, showing application of stool, apron and trim that conceals casement window operator.



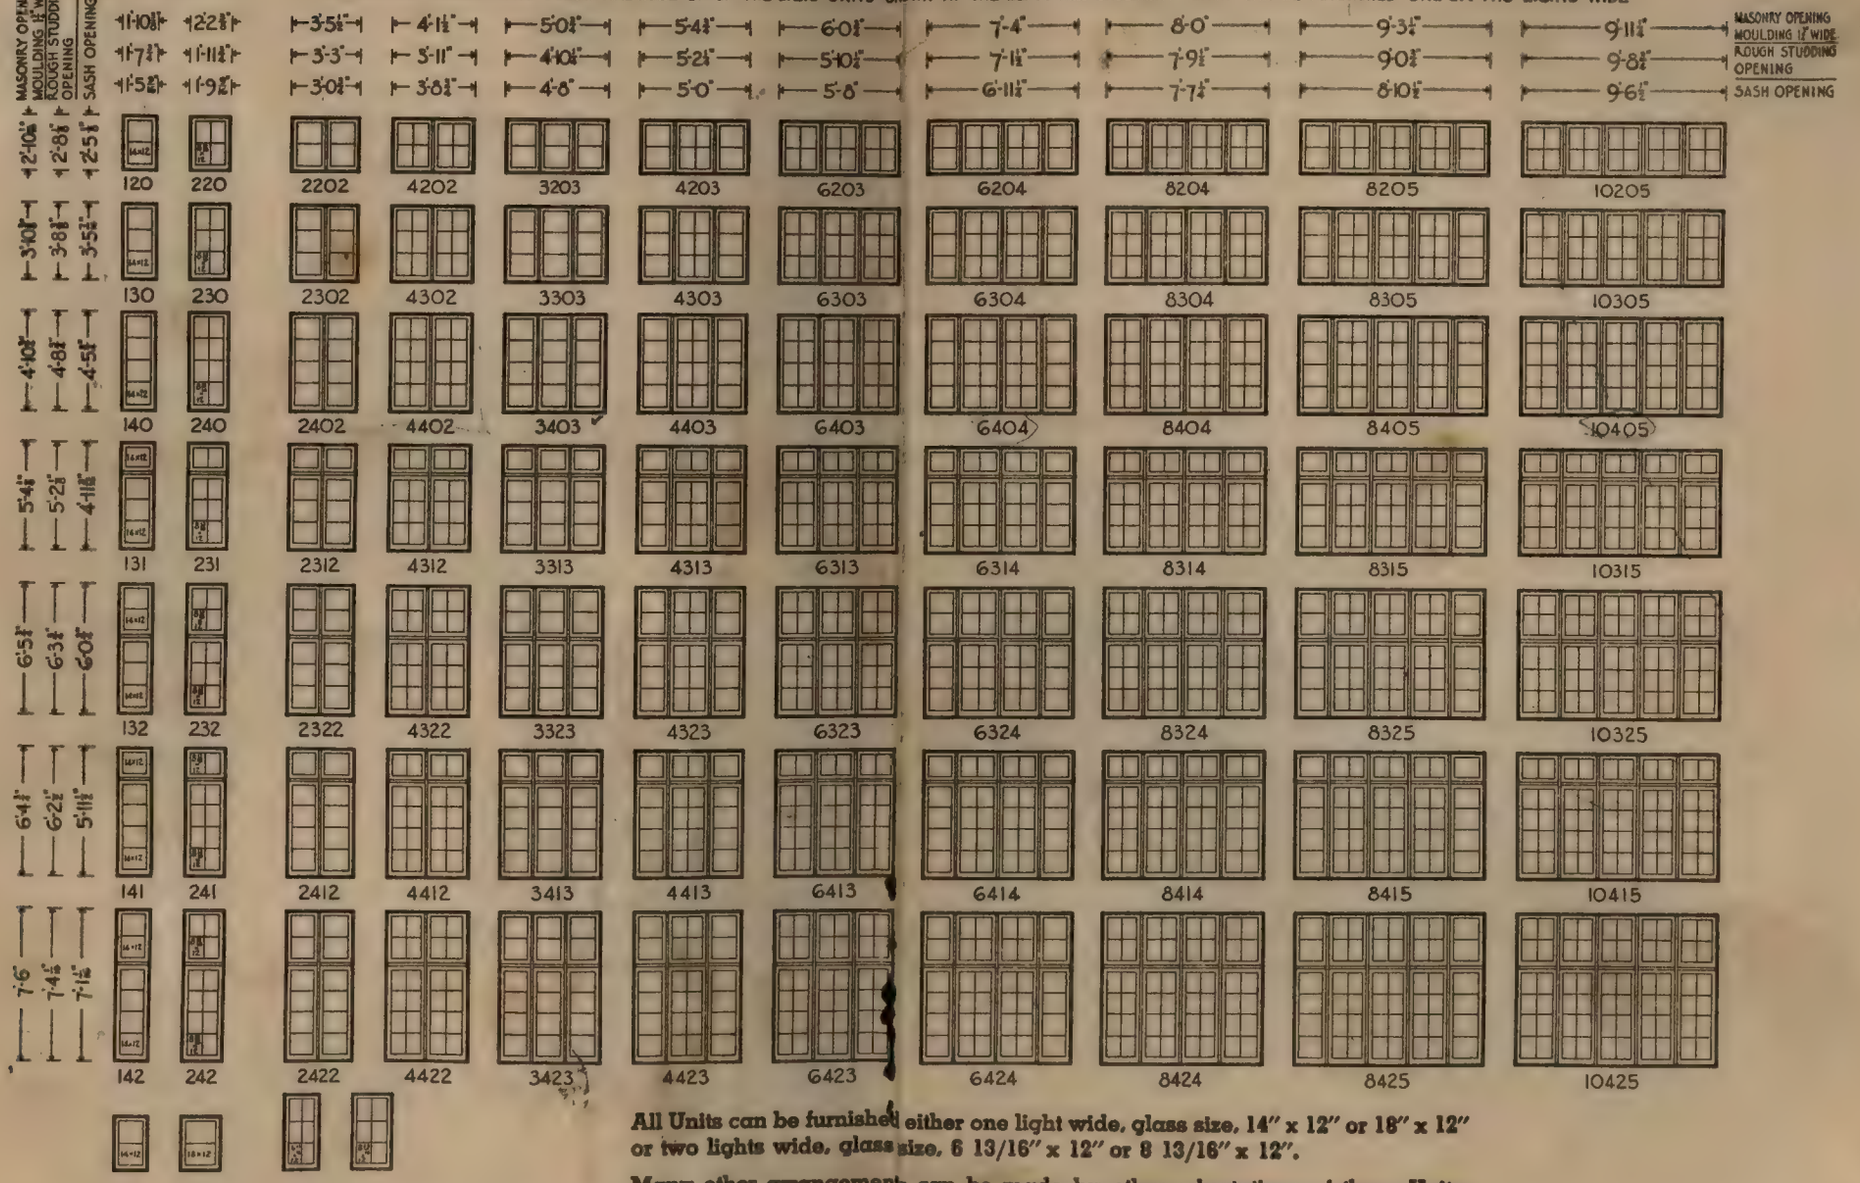




IDEAL® WOOD CASEMENTS

SCHEDULE OF IDEAL SIZES

ALL GROUP COMBINATIONS BELOW ARE MADE UP OF THE BASIC UNITS SHOWN AT THE LEFT. ALL CASEMENT SASH CAN BE FURNISHED ONE OR TWO LIGHTS WIDE



All Units can be furnished either one light wide, glass size, 14" x 12" or 18" x 12" or two lights wide, glass size, 6 13/16" x 12" or 8 13/16" x 12".

Many other arrangements can be made by other adaptations of these Units.

Any IDEAL Fabricated Casement Window Unit or series of units—also available as STATIONARY CASEMENT WINDOWS. In this type, casement hardware, interior window screen and screen lift and lock are eliminated. The STATIONARY CASEMENT is lower in cost.

IDEAL FABRICATED CASEMENT UNITS W.P.P.

DOUBLE PRESERVATIVE TREATED—N. D. M. A. STAMP OF APPROVAL

F. O. B. Warehouse or Delivered Via Our Truck

Completely assembled ready to install in the wall. Inside trim extra. See next page for trim prices.

When ordering specify: Wall construction and jamb width, how EACH SASH is to be hinged (RIGHT or LEFT looking at unit from OUTSIDE of house), if any sash are to be stationary. Sketch with order showing pertinent information is preferred.

Swinging units all open out and screens and all hardware included. No screens included for stationary sash nor transoms as they are unnecessary. Our casement furnished only with our hardware as frames are machined especially for it.

4 Lts. High 2 Lt. Tran. 7'—1-1/16"	.86	.99	.62	.71

For trim price for complete opening add the required horizontal price to the required vertical price.

The following is an example showing how to arrive at total price of an Ideal Triple Unit No. 6313 (as shown on design sheet) having all sash swinging:

3 Basic Units 8-13/16 x 12—2W3H (1'—9-9/16" x 3'—5-7/16") @ 9.89	29.67
3 Transom Units 8-13/16 x 12—2W1H (1'—9-7/16" x 1'—3-9/16") @ 2.03	6.09
Total price No. 6313 without inside trim	35.76
1 Side Type "D" W.P.P. Trim for opening 5'—8" x 4'—11-3/16" .90 plus .42	1.32
Total price complete with Type "D" W.P.P. Trim	37.08
For Brick Veneer Construction Add	.40
Total price complete for Brick Veneer	37.48

If any of sash are to be stationary figure stationary price for such sash instead of swinging sash price.

Please be very careful to specify how each SASH is hinged—RIGHT or LEFT.

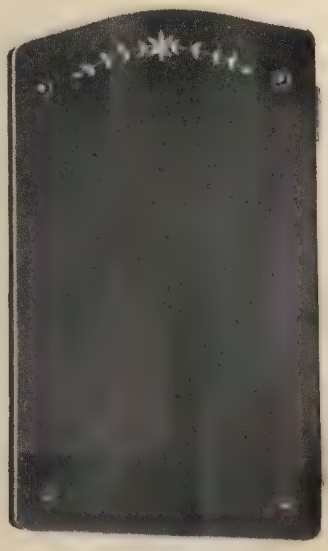
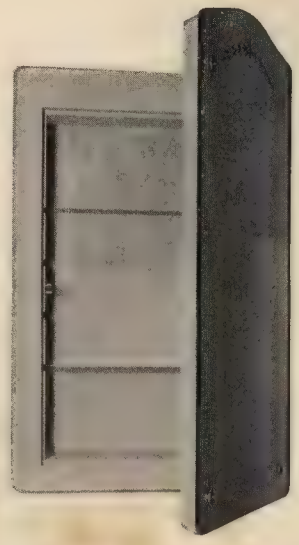
Delivered Via Our Truck—1st Class



W-952



W-952

Mirror: 14" x 24" x 3/16" Copper Sealed Crystal Sheet Glass.
Wall Opening: 12½" x 21" x 3⅝".
Weight—Carton Packed 17 Lbs.

Dealer Price 3.85

In quantities of 12 or more deduct 10%; if included in an assortment of other "Ideal" medicine cabinets, telephone cabinets, ironing board cabinets, breakfast nooks and mantels totaling 12 units, deduct 5%.

Suggested Consumer Price 5.25

The cabinet shown above is a modern all mirror front cabinet. The mirror is fastened to door with screws through attractive ornamental washers which are padded with felt. The body and door are made of Western Ponderosa Pine. The door has been double preservative treated to minimize contraction and expansion and prevent warping.

A wedge type friction catch and special design cadmium plated full mortise tight pin butt hinges are furnished applied.

Metal trimmed razor blade disposal slot is also made in each cabinet.

The wood part of this cabinet, little of which is exposed when installed, is furnished unpainted so that it may be painted to match interior trim of the building.

MIAMI - COLONIAL BATHROOM CABINETS

Delivered Via Our Trucks—2nd Class

MODEL 405

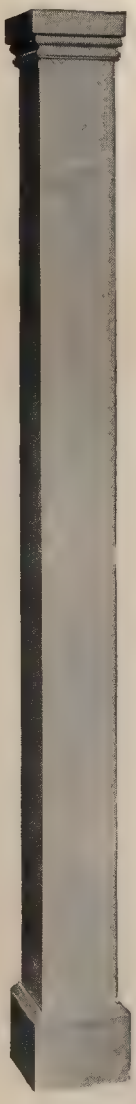
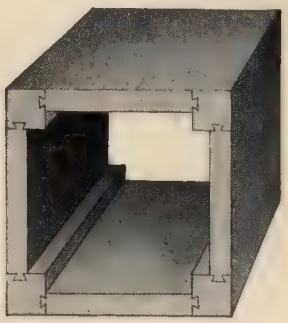
SQUARE COLUMNS

Delivered—3rd Class

Manufactured from VERTICAL GRAIN CLEAR DOUGLAS FIR



Made on a Linderman machine, using the dovetail joint which holds tight every inch of the way.



Contains no metal; therefore no rust streaks through paint. 1½" corners readily chamfered if desired. 1" stock panels—can be split for pilasters.

First quality Casein glue used in the joint. Column is carefully sanded at factory.

This column has NO TAPER or entasis.

Suitable for screened porch construction.

Also used in groupings to create an attractive effect.

Paper wrapped.

This type shaft extends the full length of opening carrying whatever weight required. Cap and base mitred around shaft, but shipped in cut mitre form.

May be had treated for 35c extra each including cap and base.

BRUCE FLOOR FINISHING MATERIALS

BRUCE FLOOR FINISH (A Durable Wood Seal)

Bruce Floor Finish is a combination of vegetable oils, varnish gums, and quick-acting solvents so processed that it can be applied with a large brush, lambs-wool mop, or rags. The solvents used insure penetration, the oils, maximum life, and the varnish gums give durability, hardness, and resistance to moisture. Does not darken the wood and forms a non-slippery surface. Covers approximately 800 square feet per gallon one coat, and only one coat is needed in most instances for a lasting finish. The ideal finish for gymnasium floors, churches, halls, public buildings and homes.

BRUCE TUF-LUSTRE (A Liquid Varnish-Aided Wax)

Tuf-Lustre is a varnish aided liquid wax which acts as a preservative and polish when applied over floor finish or varnish. It dries quickly, does not become brittle and tests show that it has three times the durability of regular floor wax. Gives a non-slippery surface which may be readily cleaned by dry sweeping. Covers 1500 square feet per gallon first coat and 2000 square feet for second coat.

BRUCE FLOOR POLISH (A Self-Polishing Wax)

Bruce Floor Polish is a self-polishing liquid emulsion of Carnauba Wax. Used as a final protective coat over Tuf-Lustre, it prolongs the life of the surface, is impervious to oil and grease and enhances the color effects of the finished floor. Requires no polishing to produce a lustre, dries hard in twenty minutes. Recommended also for linoleum, asphalt tile, and other composition floorings. Covers 1500 square feet per gallon.

BRUCE FLOOR FINISHING MATERIALS

BRUCE FLOOR CLEANER (A Solvent Wax Cleaner)

A liquid cleaner, designed to remove wax and dirt on a floor, without injuring the finish beneath. Dries rapidly and leaves an extremely thin film of wax on the surface. To be used on wood surfaces only, and not on rubber tile, linoleum, etc. Covers 2000 square feet per gallon.

BRUCE PASTE WAX

Bruce Wax is an ideal polish for wood, composition, tile and marble floors, woodwork, furniture, leather goods, etc. It is especially recommended for hardwood floors. Can be applied over any type of finish and produces a lustrous surface that is hard to mar and easy to maintain.

BRUCE FLOOR FINISHING UNIT

Each unit contains the right proportions of Bruce Floor Finish, Filler, Solvent and Wax for finishing oak flooring the "Bruce-Way." Packed in three sizes to cover 250 sq. ft., 500 sq. ft. and 1,000 sq. ft. of flooring. Available in three shades of finish: Light Oak, Medium Oak, Dark Oak.

BRUCE GYMNASIUM FINISH

A finish with 100% Bakelite base designed for use on gymnasium floors. Bruce Gymnasium Floor Finish resists the action of rubber burns, acids and perspiration. Very durable and easy to maintain. Covers 500 sq. ft. per gallon on first coat, 600 sq. ft. on second coat, and 700 sq. ft. on third coat.
